----------------------------	---

<b>Service aims:</b>	To support children at Primary School age whose primary area of difficulty is SLCN and who have a statement of SEN to reflect this. Children without a statement may also be considered for a part-time place or may receive support within their mainstream school.
----------------------	--

<b>To access the support:</b>	A referral for a place at the Centre must be made by a Speech and Language Therapist, Educational Psychologist, School or other professional and is put forward to a panel of professionals. There is a panel meeting every half term.
-------------------------------	--

<b>Method of support:</b>	Children will receive SLT input – both group and individual. If required, pupils will receive support in the classroom, for curriculum differentiation, visual support, social skills and interaction support and access to specialist equipment and resources. The overall aim of the Centre is to successfully integrate pupils back into their mainstream schools.
